

PERMACONN™
leaders in wireless security technology

TECHNICAL ADDENDUM

PERMACONN PM45(v3) - Direct Alarm Panel Dialer Connection

Technical Addendum Number: RDC_TA_PM45v3 – Direct Connection to Alarm Panel Dialer_201502

Background:

The PM45-3G(v3) communicator now has a terminal block for the connection of the female 611 fly lead (supplied). If the Alarm Panel also has a terminal block for PSTN connection, we recommend you use your own cable between the Alarm Panel dialer and PM45-3G(v3).

This type of installation negates the use of the female 611 fly lead, decreasing your installation time.

For six (6) pin RJ connectors, please refer to manufactures wiring diagram – Tecom & Concept detailed below.

Detailed below is a sample of these types of connections for some popular panels.

Refer to Page 2 for wiring samples
