

## Paradox DGP NE96 Alarm Panel

- ✓ **Panel Dialler wiring**
- ✓ **Panel Dialler programming**

**PERMACONN™**  
leaders in wireless security technology

### **Background:**

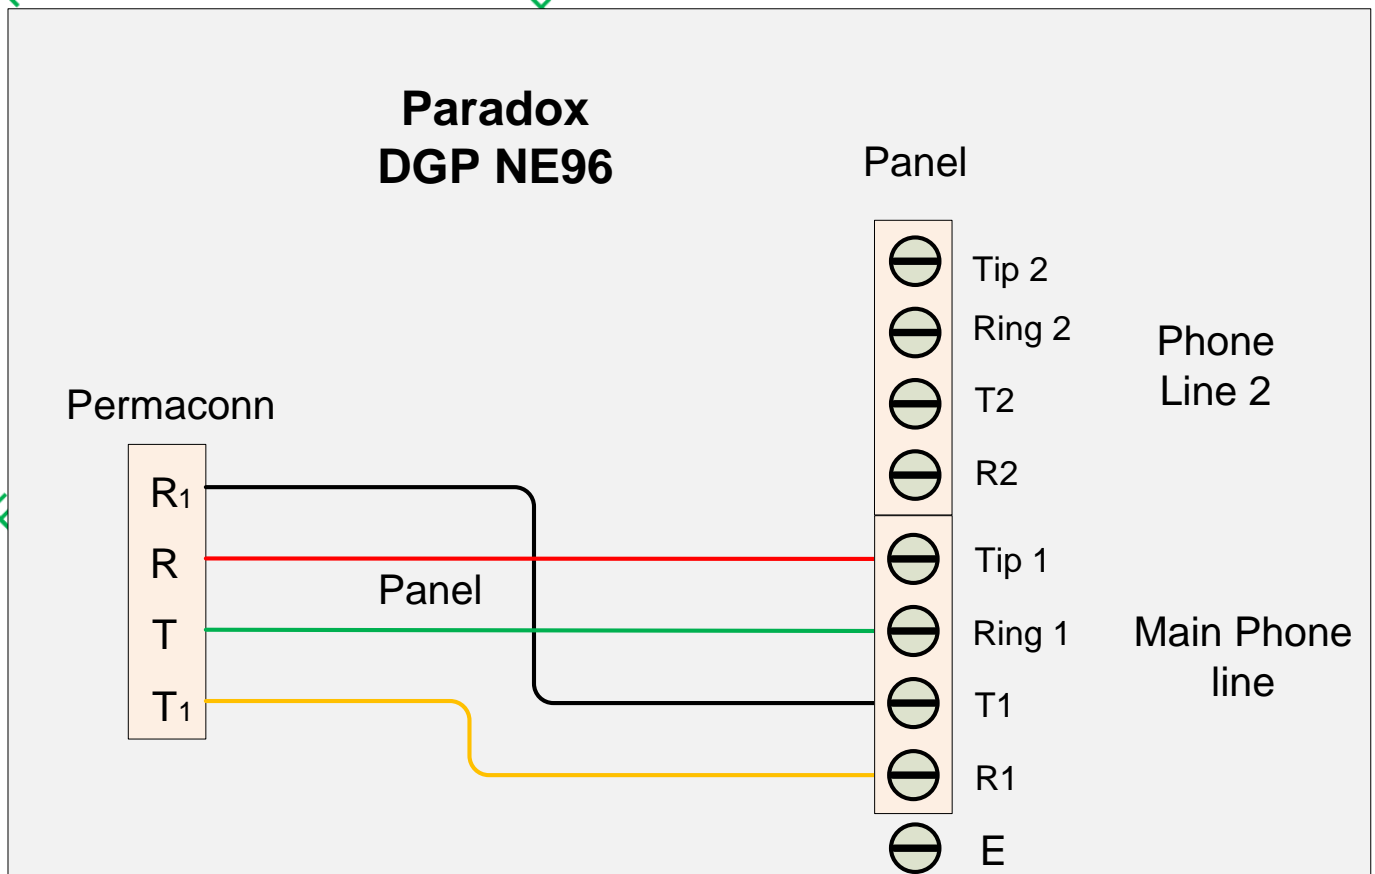

The PM45 & PM1048-3G (v3) communicator now has a terminal block for the connection of the female 611 fly lead (supplied). If the Alarm Panel also has a terminal block for PSTN connection, we recommend you use your own cable between the Alarm Panel dialler and PM45 & PM1048-3G (v3).

This type of installation negates the use of the female 611 fly lead, decreasing your installation time. For four (4), six (6) and eight (8) pin RJ connectors, please refer to manufactures wiring diagram.

There are four minimum requirements from the Alarm panel for successful communication:

- 1) Must have an eight (8) digit primary phone. E.g. 12345678 or 55555555.
- 2) A four (4) digit account number.
- 3) Must be Contact ID format.
- 4) Must be set for tone (DTMF) dialling.
- 5) Optional is open / close reporting, must be enabled for Pocket Secure App.

### **Dialler Lead wiring between Permaconn and Paradox DGP NE96 Alarm Panel:**

**Paradox DGP NE96 Alarm Panel programming.**

**Section 3036:**

Dialler Enable/Disable: Option 3 Must be ON.  
Tone/DTMF: Option 4 Must be ON.

**Section 3070:**

Reporting Format: Enter 5555.

**Section 3061 – 3068:** Part 1 – 4: Account Number

Section	Partition	NB: When entering the account number a '0' is entered as an 'A'. E.g. 0123 is A123  <b>0 = A</b>
3061	Account 1 (4 digits)	
3062	Account 2	
3063	Account 3	
3064	Account 4	
3065	Account 5	
3066	Account 6	
3067	Account 7	
3068	Account 8	

**Section 3071:**

CS Phone 1: Any 8 digits e.g. 12345678

**Disarming Report Code**

**Keyswitch reporting:** Must be enabled for Pocket Secure App: Must be set to 1 / 1 (default is F / F)

**Keyswitch Arming Report Code**
